DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Claims 1-23 and 58-63 in the reply filed on 11/29/05 is acknowledged.

Upon further review, it is noted that additional restriction is appropriate.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 and 41-57, drawn to interactive television transactions utilizing a smart card, classified in class 725, subclass 86.
- II. Claims 18-23 and 58-63, drawn to transmitting a distress signal, classified in class 725, subclass 108.

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention II has separate utility such as implementing a distress signal in a portable telephone system.

See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2617

5. Because these inventions are distinct for the reasons given above and the search required for any of Groups I-II is not required for any of the other Groups, restriction for examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
